ELEVATION

— PARK MODEL COMPANY —

***We look forward to pushing
the boundaries of what's
possible in a Park Model***

Built to a higher standard

Elevation Park Model Company was born out of a need in the market for a new manufacturer with a different way of doing things. Seeing a growing demand for Park Model RVs across the country, and a shortage of product on dealers' lots, Brent Kattau and Joel Lederman decided to venture out on their own. With over 25 years of combined experience, they have covered many positions including parts, customer service, engineering, purchasing, and sales. Both were heavily involved in the innovation and design process for an established manufacturer. In the fall of 2021, they started construction of a 65,000 square foot modern production facility in Elkhart, Indiana and began assembling a group of well-established dealers to partner with.

Elevation's goal is to combine a passion for uplifting people to reach their potential, creating a team atmosphere where everyone feels valued, and a commitment to building the best quality product on the market. We look forward to pushing the boundaries of what's possible in a Park Model, providing a great experience for customers, an honest relationship with dealers, and family environment for our employees for many years to come!

Two handwritten signatures in black ink. The signature on the left is "Brent Kattau" and the signature on the right is "Joel Lederman".

LEFT:
7-103 kitchen shown with Natural Stain cabinets,

Floor plans

Elevation floorplans have been engineered to utilize the maximum 400 square feet in the most efficient way possible. Each Park Model can be built as a single, double, or non-loft, also giving the option of a straight or drop frame. Customers have the ability to choose between five front-end window designs, multiple bathroom layouts, and different wardrobe options, which are interchangeable in each floorplan. Many plans can accommodate amenities such as washer & dryer, dishwasher, larger refrigerator, or sectional sofa. Depending on the location of the unit, customers can select to have the floorplan flipped end-to-end or rolled side-to-side to best suit their needs.

NOTE: All floorplans can also be built as **non-lofts**.
